User opinions That's what people say about Music Organizer possibilities:"On our radio station, as on any other, is stored a large amount of MP3 music files. Some of them are played regularly, some of them not. To find needed music record in our audio archive, where are stored the millions of files, is very hard. We had to hire a special employee, who categorized records in archive, but even such salvation was not perfect - we periodically received several thousands of records in a day, and a person who organized them, could not organize them all and made a lot of errors. All this unorganized music records collected, collected and collected... One day while real-time broadcasting music clips, prepared to transmission, were lost in all this chaos and we were forced to break transmission. My colleague from another radio station called me, when knew about incident, and advised to use Music Organizer. Over several hours all our thousands of MP3 music files were organized and even if we are gathering several thousands of new audio records at some days, Music Organizer easily append them to common music base - right from audio CD's! It is the best music organizer I had ever seen - it organize my MP3 music files exactly as I want. Thanks very much all Music Organizer developers. Program, that they made, really helps people."

James Tilton, sound producer of radio-station "Voice of Colorado",

James.Tilton@ColoradoRadio.com "At April issue of "My Computer" magazine I read that Music Organizer - is the easiest and most user-friendly way to sort, rename and organize MP3 files. I have large MP3 file collection on my computer. Several first years it was easy to maintain it, but now, when I periodically download variety of MP3 files from Internet it became very hard to find something in my MP3 files collection. I did not know what to do - variety of folders and in every of them are MP3 music files those I even never heard. I even wanted to stop collecting of MP3 files, but suddenly come in mind that article - and I downloaded and started Music Organizer. It was like a miracle - all my MP3 files were sorted, renamed, organized automatically, exactly as I wanted. Really useful MP3 music organizer - It is needed for everyone who has MP3 files and wants them to be in ideal order."

Christopher Garvin, music collector, ChrisGarvin@Mp3.com Music Organizer can Organize all types of Music and Photos

Music organizer - for what music organizer is created? How to find the best music organizer and how it can organize

music files? Music organizer is not just organizing MP3 music files, it is not just an organizer for MP3 music files, MP3 music organizer for music of all types, file organizer for photos in all formats or a file organizer for videos. Music Organizer - is a solution to organize, sort and rename all types of files - Music Organizer will organize MP3 files (music organizer support this popular music format). Music Organizer organize music in variety of music formats - OGG, AC3, WMA, and many others. Music Organizer organize MP3 music files in uncompressed formats - WAV, AIFF and AU. Also this music organizer sort, organize and rename music files in all existing lossless compression formats - FLAC, APE, WAV Pack, TTA, Apple Lossless and many others. And, of course, MP3 music organizer sort, rename and organize mp3 music files compressed in all lossy compression formats. Here we tell more about this music formats. First, it is MP3 (this abbreviation means MPEG-1 Audio Layer 3). This music format is organized, sorted and renamed using Music Organizer and is presented on most part of personal computers, notebooks, music players. A whole hard drives are filled with MP3 music files (MP3 music) and Music Organizer can organize, sort and rename all this MP3 music files, organize and sort exactly as you want. MP3 music format was created by several engineer teams in United States (AT&T Bell Labs) and Germany (Fraunhofer IIS). Our company (Best Music Organizer, Inc.) also mad contribution in MP3 music format development while Music Organizer development process (while appending to Music Organizer mp3 music organizing, automatic sorting and renaming support). Music Organizer is very useful for everybody who has MP3 music files on computer, MP3 music files on notebook or music player - all they will be automatically organized, renamed and sorted with Music Organizer.

Our Mission: With Music Organizer all Music will be in Ideal Order

Music organizers - why music organizers and music organizing are so important now? Today life is impossible to imagine without information, and information - without files. By reports, provided by independent researches, now more than 95% of information is stored in files.

Let's look on music organizer history and the history for music file storages, which are connected with each other very closely. In 1970's, when first floppy disk was invented, it had 0.1 Megabyte size and often holds up to 15 files. It is less than 1 MP3 music file and you do not need MP3 music file organizer to organize MP3 music files inside of such file storage. In 1980's was invented CD disk, which already had 500 Megabyte size and could hold already thousands of files. Storing MP3 music files on such memory device you already need several hours to organize MP3 music files manually without some sort of automatic music organizer, music renamer or music organizer. In 1990's became popular DVD disks, which could carry already dozens of thousands of files. To organize MP3 music files, stored on a single DVD disk, for example by artist and album, it may be needed already of whole day to do it without some sort of automated MP3 music organizer, MP3 music sorter or MP3 music renamer. Today most of MP3 music files are stored on HDD (Hard Disk Drives), which are presented in every computer. Such hard drives have size beginning from 80 000 Megabyte and already hold millions of documents. Such amount of MP3 music files (thousands and thousands of MP3 music files to sort, organize and rename) already may not be organized, renamed or sorted according to your preferences without using of full-automatic MP3 music sorter, MP3 music renamer or automatic MP3 music organizer.

Music Organizer is needed every day more and more because more and more MP3 music files need to be sorted, organized and renamed every day. For example, several weeks ago was already started production of Hard disk with 900 000 Megabytes size, that is able to store already milliards of documents in variety of formats. And all this documents (MP3 music files, JPEG photo files, AVI video files and many others) should be sorted, organized, renamed and catalogued. It already may not be done manually - human person may not be used as the music organizer.

Music Organizer and your computer: when on a computer is stored such variety of MP3 music files, especially if they are packed in numerous of archives, it is extremely hard to navigate between them. People often don't know, what files and where are stored.

So, what we see without MP3 music organizing with Music Organizer? When in a folder are several hundreds, or even thousands of files with names like "690.mp3", "audio476.mp3", "mp216.rar", "concert37.avi", "album12.zip" it will be needed days, or even weeks and months to understand, what is what, organize, rename all and move all in folders, according to content.

Now you see - the whole directories are deleted, because there is no possibility to find out, what is inside and use such content. You are in the danger! Is any salvation of such heavy situation? Yes, and it is - Music Organizer. This automatic MP3 music organizer, MP3 music renamer, MP3 music sorter and MP3 music cataloguer will sort, rename and organize all your files, MP3 music, photos, videos and other media automatically. Just press Download button - all your music, photo, video files will be in ideal order with such powerful music organizer, music manager and music cataloguer as Music Organizer!
